These values do not reflect the payout percentage of any individual game. Instead, they represent the payout percentage over all games within the category. These values are based on historical records, and do not necessarily represent expected future payouts. The Calculated Payout Percentage is computed by summing all monies won (for all games within a category) and dividing by the total money bet on the same games.

Playtech's 'Live' games are included within GLI's calculations, and are reported within GLI's Game Payout Calculation Letters, as part of the 'Card Games' or 'Table Games' categories (as appropriate).

GLI's Game Payout Calculations were limited to the game play log files submitted by Playtech (Cyprus) Limited, and reviewed by GLI in the laboratory environment. For verification purposes, GLI has maintained a control version of these files. The Scope of Work for GLI's Game Payout Calculations did not include a technical assessment of the Noble Casino Internet Gaming System or the associated Information Systems (IS) and financial controls.

GLI confirms that the payout percentages listed above have been correctly calculated based on the amounts wagered and won for the period of 01 January 2016 to 31 December 2016.

Assuring you of our best attention at all times.

Yours sincerely,
